

OeTZI3300
Collection four - Spring / Summer 2011

OeTZI3300 takes you on a journey back in time to a prehistoric man named "Oetzi" who has been carbon dated to 3300 B.C. His mummified body, unveiled from his frozen state by "global warming", was wearing nothing more than the basic essentials he needed for survival - gear for protection and warmth, as well as a unique pair of shoes.

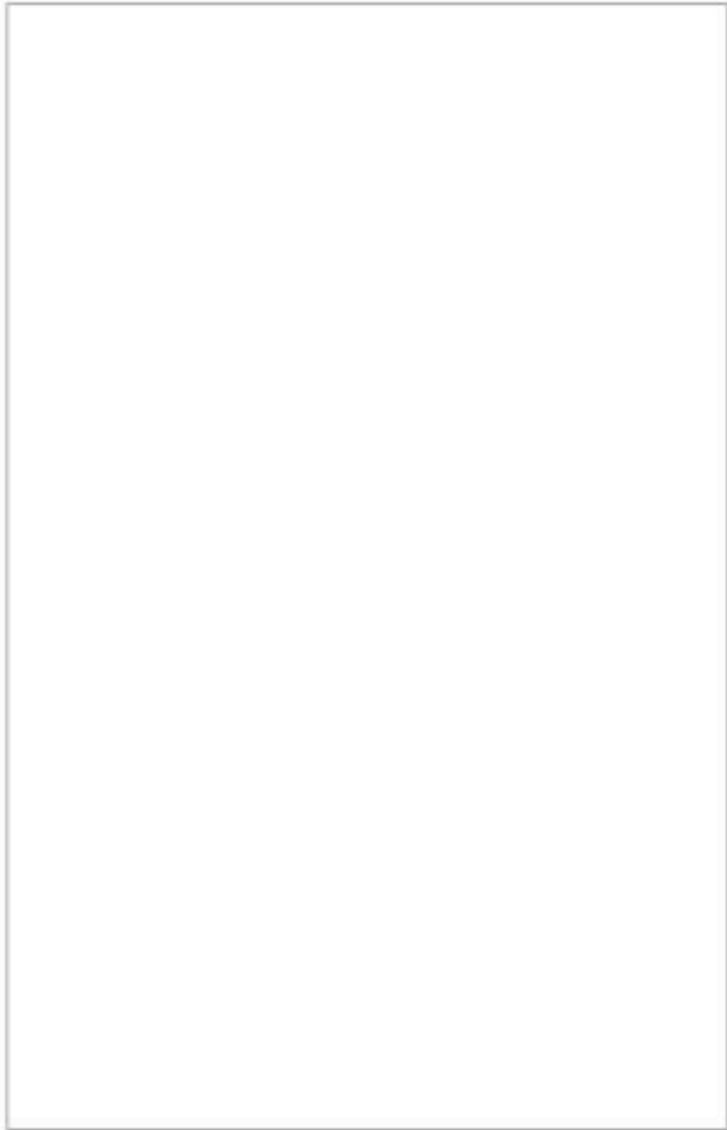

Inspired by the simple yet functional design of Oetzi's shoes, our need to be environmentally responsible and promote the art of well being, OeTZI3300 is remastering the basic essentials from the past in a fresh and relevant way. Premium materials are sourced worldwide to assure optimum quality produced and crafted with the same understated complexities that run through Oetzi's DNA.

This Spring we introduce two Cork Comfort Technologies,

CORKlite: This lightweight solution provides a soft cushioned ride with the unique antimicrobial properties of cork reducing bacterial build up and allowing the user to wear the shoes with or with-out socks. The anatomical design is made of cork and recycled EVA and is lined with a micro synthetic suede cover. An ideal Vegan solution.

CORKfit: This combination provides a firm ride that gradually conforms to the shape of the users feet with the unique antimicrobial properties of cork reducing bacterial build up and allowing you to wear the shoes with or with-out socks. The anatomical design is made from cork and recycled rubber and is lined with a suede leather cover.

Made for an all day, everyday adventure, OeTZI3300 will be proud to take you from the highs and lows of our multicultural metropolis to the many trails that path our majestic planet.

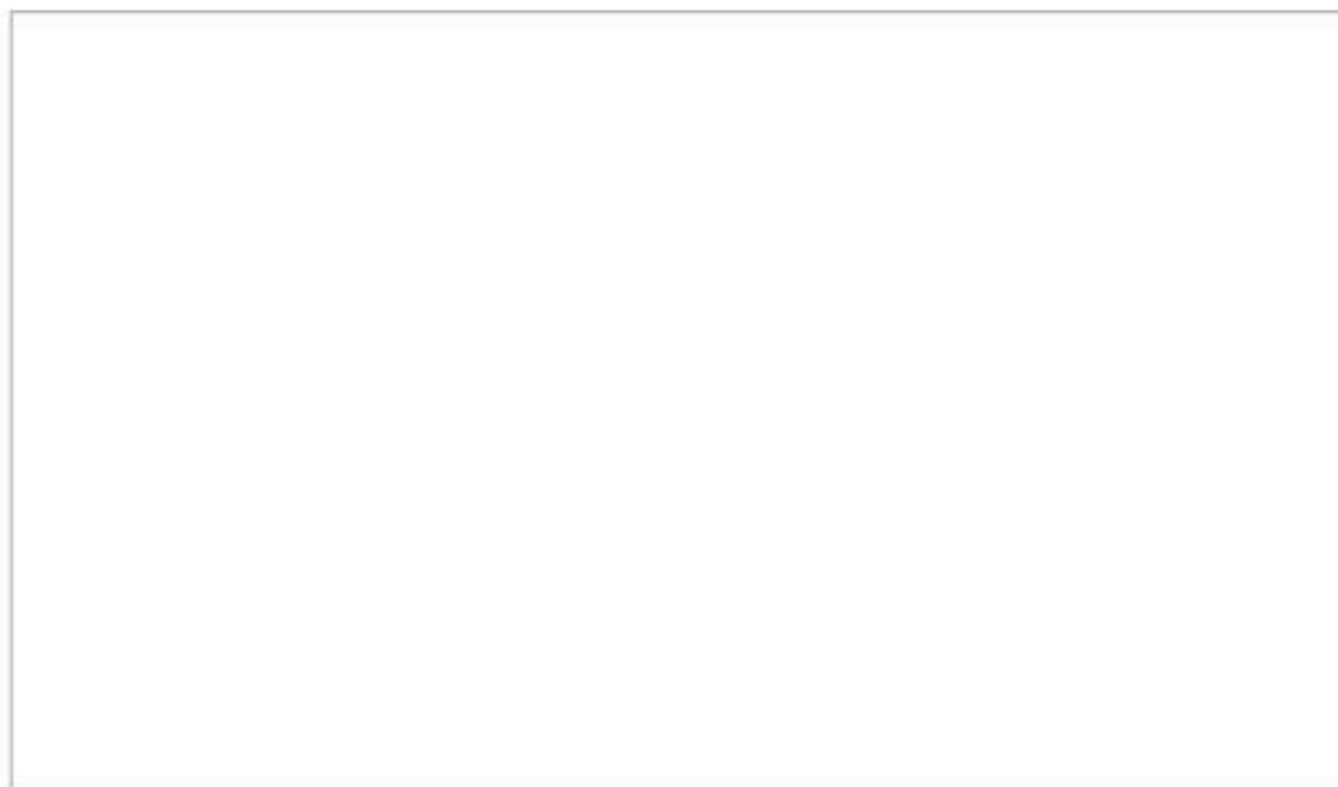

Spring 2011 Collection.

OTZ-300GMS Natural (White)
OTZ-300GMS Nero (Black)
